

Frac2X

Convert a Fract to an Extended data type

#include <FixMath.h>

Toolbox Utilities

double **Frac2X**(*arg*);
Fract *arg* ; value to convert
 returns *arg*, expressed as a double data type

Frac2X returns its Fract argument, converted into an Extended data type.

arg is a 32-bit Fract value.

Returns: a 64-bit double value, equivalent to *arg* to the best precision possible for the data type.
