

TPrInfo structure

```
#include <PrintTraps.h>
```

typedef struct TPrInfo {		<u>Size</u>	<u>Offset</u>	<u>Description</u>
<u>short</u>	iDev;	2	0	Device code used by Font Mgr and Quickdraw
<u>short</u>	iVRes;	2	2	Vert resolution of device (dots per inch)
<u>short</u>	iHRes;	2	4	Horizontal resolution of device (dpi)
<u>Rect</u>	rPage;	8	6	Printable page size (<u>top</u> and <u>left</u> are usually 0; physical paper size is in <u>TPrint.rPaper</u>)
} TPrInfo ;		14		

```
typedef TPrInfo *TPPrInfo;
```

Notes: **TPrInfo** defines the printer information subfield of the TPrint structure (ie TPrint.prInfo). Its fields are set according to selections made in the print dialogs.
