

**Fix2X**

Convert a Fixed to an Extended data type

#include &lt;FixMath.h&gt;

**Toolbox Utilities**

<u>double</u>	<b>Fix2X</b> ( <i>arg</i> );	
<u>Fixed</u>	<i>arg</i> ;	value to convert
	<b>returns</b>	<i>arg</i> , expressed as a <u>double</u> data type

**Fix2X** returns its Fixed argument, converted into an Extended data type.

*arg* is a 32-bit Fixed value.

**Returns:** a 64-bit double value, equivalent to *arg*.
