

DisposelconSuite Dispose of icon family

#include <Icons.h>

Finder Interface

<u>OSErr</u>	DisposelconSuite (<i>theSuite</i> , <i>disposeData</i>);
<u>Handle</u>	<i>theSuite</i> ; <u>icon family</u> to dispose
<u>Boolean</u>	<i>disposeData</i> ; dispose of icon data handles?
	returns <u>Error Code</u> ; 0 = no error

DisposelconSuite call disposes the icon family handle itself; in addition if *disposeData* is TRUE, any of the icon data handles that do not belong to a resource form will also be disposed.

Notes: This routine is not currently documented in MPW header files (hence, it is not in any THINK C or THINK Pascal header file either). The information given above comes from Macintosh Technical Note #306. This tech. note also gives the inline glue for the call as follows:

pascal OSErr **DisposelconSuite** (Handle theSuite, Boolean disposeData)
= {0x303C, 0x0302, 0xABC9};
