

SystemZone Get address of the start of the system heap zone

#include <Memory.h>

Memory Manager

THz **SystemZone();**
 returns address of the system heap zone

SystemZone returns the address of the start of the Zone structure of the system heap. This is the same as the value stored in the global variable SysZone (at 0x02A6).

Returns: a pointer to a Zone structure; the address of the start of the system heap zone.
