

GetPreserveGlyph

Find whether TrueType glyph shape is preserved or not

#include <Fonts.h>

Font Manager

Boolean **GetPreserveGlyph**(void);

The **GetPreserveGlyph** function returns a Boolean value indicating whether the **Font Manager** preserves the shape of TrueType glyphs, which by default is FALSE. Your application can set the behavior of the **Font Manager** using the **SetPreserveGlyph** procedure.

Returns: Boolean TRUE = does preserve TrueType glyph shape
 FALSE = does not preserve TrueType glyph shape
