

EditionInfoRecord structure

```
#include <Editions.h>
```

typedef struct EditionInfoRecord {		<u>Size</u>	<u>Offset</u>	<u>Description</u>
<u>TimeStamp</u>	crDate;	4	0	date EditionContainer was created
<u>TimeStamp</u>	mdDate;	4	4	date of last change
<u>OSType</u>	fdCreator;	4	8	file creator
<u>OSType</u>	fdType;	4	12	file type
<u>EditionContainerSpec</u>	container;	22	16	the Edition
} EditionInfoRecord;		38		

The crDate field contains the creation date of the edition. The mdDate field contains the modification date of the edition.

The fdCreator and fdType fields are the creator and type of the edition file. The container field includes a volume reference number, directory ID, filename, script, and part number for the edition.
