

GetCtlMax Query the maximum value allowed for a control

#include <Controls.h>

Control Manager

short **GetCtlMax**(*theControl*);
ControlHandle *theControl* ; handle of the control to query
 returns control's maximum setting; contrlMax

GetCtlMax returns the current value in the contrlMax field of a control's ControlRecord.

theControl is a handle leading to a variable-length ControlRecord structure. It specifies which control to query.

Returns: a short; the current value of (*theControl)->contrlMax.
