

Long2Fix

Convert a long to a Fixed data type

#include <FixMath.h>

Toolbox Utilities

<u>Fixed</u>	Long2Fix (<i>arg</i>);	
<u>long</u>	<i>arg</i> ;	value to convert
	returns	<i>arg</i> , expressed as a <u>Fixed</u> data type

Long2Fix returns its long integer argument, converted into a Fixed data type.

arg is a 32-bit long value.

Returns: a 32-bit Fixed value, equivalent to *arg* to the best precision possible for the data type.
