   <u>unsigned long</u>   Reserved[5];   20   18   Reserved for PPC, Don't use
                                              38

Notes: **PPCHeader** is a #define'd macro that defines the fields that are shared by
         some of the parameter block types used by the low level calls of the
         PPC Toolbox. These fields are placed in every parameter block that has
         PPCHeader as a field.
