GetIconCacheProc   Get procedure associated with an icon cache

#include <Icons.h>   **Finder Interface**

OSErr   **GetIconCacheProc (** *theCache, theProc* **) ;**
Handle   *theCache* ;   handle to icon cache
Ptr   * *theProc* ;   receives ProcPtr from icon cache
               returns   Error Code; 0 = no error

GetIconCacheData obtains the ProcPtr associated with *theCache*. The
ProcPtr is returned in *theProc*.

Notes: This routine is not currently documented in MPW header files (hence, it is
         not in any THINK C or THINK Pascal header file either). The information
         given above comes from Macintosh Technical Note #306. This tech. note
         also gives the inline glue for the call as follows:

```
pascal OSErr GetIconCacheData (Handle theCache, Ptr *yourDataPtr)
       = {0x303C, 0x041B, 0xABC9};
```
