SPBStopRecording   Resume recording from the specified device

#include <SoundInput.h>   **Sound Manager**

OSErr   **SPBStopRecording(**_inRefNum_**)**;
long   _inRefNum;_   a valid reference number for a device
               returns   Error Code; 0=no error

The **SPBStopRecording** function stops recording from the device specified
by the _inRefNum_ parameter. The recording must be asynchronous for this call
to have any effect. When you call **SPBStopRecording**, the completion routine
specified in the completionRoutine field of the sound input parameter block ,
SPB, is called and the error field of that parameter block is set to abortErr.

inRefNum must contain a valid reference number for an input device

Returns: an operating system Error Code.
               noErr   (0)   No error
siBadSoundInDevice   (-221) Invalid sound input device
