DefOSRec   structure

#include <Start.h>

typedef structure {		Size	Offset	Description
char	sdReserved;	1	0	Reserved
char	sdOSType;	1	1	Default operating system identification
} DefOSRec;		2		

typedef DefOSRec ***DefOSPtr**;

Notes: This structure is used in calls to **GetOSDefault** and **SetOSDefault**
identify which operating system will be used when the system starts up.
