AEDescList   structure

#include <AppleEvents.h>

typedef AEDesc   **AEDescList**;   list of descriptor records

A descriptor list is a data structure of type **AEDescList** defined by the data
type AEDesc-that is, a descriptor list is a descriptor record that contains a
list of other descriptor records. Like several other **Apple Event Manager**
data structures, a descriptor list is identical to a descriptor record of data type
AEDesc; the only difference is that the data in a descriptor list must always
consist of a list of other descriptor records.
